

**PLANT:** Saltcedar  
*Tamarix*

This Plant is a

**MONTANA**  
**NOXIOUS WEED!!**

**Growth:** 5-20 Feet Tall

**I.D.** This is a evergreen shrub or small tree.  
Stems are highly branched.  
Stems are redish-brown.  
Leaves are alternate.  
Leaves contain high levels of salt.  
Flowers are shades of pink.

**Other:** Each full grown plant can take in as much as 300 gallons of water per day.  
The plant then removes the salt from the water storing it in the leaves.  
These leaves then drop of and sterilize the ground around the tree.
